

Watering your plants

A plant is a living organism, once you buy one it is your responsibility to care for its needs, especially to water it as needed. It is extremely important to water your plant correctly in order for your plant to live and be healthy. Here are some instructions for you to follow according to the type of tree, shrub or palm.

The watering is to be done with a hose or bucket. The use of sprinklers could be additional, but it **does not** count to this watering instructions.

PLANTS IN GENERAL:

WATER AMOUNT BY TREE SIZE:

200 gal. TREE: 8 to 10 gallons into the water retention

Temperatures higher than 91 °F: every day.

Temperatures between 76° and 90°F: every other day.

Temperatures between 55°F and 75°F: two times a week.

Temperatures below 54°F: once a week

95 gal. TREE: 6 to 7 gallons into the water retention

Temperatures higher than 91 °F: every day.

Temperatures between 76° and 90°F: every other day.

Temperatures between 55°F and 75°F: two times a week.

Temperatures below 54°F: once a week.

45 and 65 gal. TREE: 4 to 5 gallons into the water retention.

Temperatures higher than 91 °F: every day.

Temperatures between 76° and 90°F: every other day.

Temperatures between 55°F and 75°F: two times a week.

Temperatures below 54°F: once a week.

15 and 30 gal. TREE: 3 to 4 gallons into the water retention.

Temperatures higher than 91 °F: every day.

Temperatures between 76° and 90°F: every other day.

Temperatures between 55°F and 75°F: two times a week.

Temperatures below 54°F: once a week.

Plants that need LESS watering:

Some trees or shrubs need less watering.

These are some: **Texas Mountain Laurel, Dogwood, Red Bud, Japanese**

Yew, Red Tips, Italian Cypress. *You might need to adjust according to the amount of rain.* Here are the instructions for them:

45 and 65 gal. TREE: 4 to 5 gallons into the water retention.
retention.

Temperatures higher than 91 °F: every other day.

Temperatures between 76°F and 90°F: every three days.

Temperatures between 55°F and 75°F: every four days.

Temperatures below 54°F: once a week.

15 and 30 gal. TREE: 3 to 4 gallons into the water retention.

Temperatures higher than 91 °F: every other day.

Temp. between 76°and 90°F: every three days.

Temperatures between 55°F and 75°F: every four days.

Temperatures below 54°F: once a week.

WATERING PALM TREES:

6' to 10' of trunk Florida Sabal, 100- & 200-gallon Queen palm, Chinese Palm, Sylvester Palm, True Date Palm, Pindo Palm.

Amount of water into the water retention.

Temp. higher than 91 °F: 10 to 12 gallons every other day.

Temp. between 76°and 90°F: 10 to 12 gallons twice a week,

Temp. between 55° 75°F: 8 to 10 gallons twice a week.

Temp. below 54°F: 8 to 10 gallons once a week.

45 and 65 gal. Palm Trees:

amount of water in to the water retention.

Temperatures higher than 91 °F: 5 to 6 gallons every day.

Temp. between 76°and 90°F: 5 to 6 gallons every other day.

Temperatures between 55° 75°F: 4 to 5 gallons twice a week.

Temperatures below 54°F: 4 to 5 gallons once a week.

15 and 30 gal. Palm Trees:

amount of water in to the water retention.

Temperatures higher than 91 °F: 3 to 4 gallons every day.

Temp. between 76°and 90°F: 3 to 4 gallons every other day.

Temperatures between 55° 75°F: 2 to 3 gallons twice a week.

Temperatures below 54°F: 2 to 3 gallons once a week.

Exceptions to Palm watering instructions:

FLORIDA SABAL PALM TREES.

If you decide to plant your palm in a flowerbed area, where you have sprinklers, you do not have to do extra watering by hand.

If there are no sprinklers, then do 4 gallons twice a week.

BUT If you plant your palm in a **grass area** it will need watering by hand, 4 gallons, twice a week plus the regular use of your sprinklers.

WINDMILL PALM TREE.

If you plant your palm in a **flowerbed area** and you use sprinklers you don't have to do any watering by hand.

If no sprinklers do 2 gallons twice a week. **BUT** If you plant your palm in a **grass area** it will need watering by hand, 2 gallons twice a week, plus the regular use of your sprinklers.

Tips:

- **Fertilize your plants at least two times a year during growing season (early Spring and early Fall).**
 - **Spray for insects and diseases.**
-

**** If you are going away for a few days, have someone responsible water your plants****

DELIVERY:

- 1. We will deliver your plants and leave them in your driveway.**
- 2. Special placement of the plants (i.e. in the backyard, by the pool) will incur in extra charges and must be prearranged.**
- 3. There is no warranty on trees that we do not install.**
- 4. We will not take the trees out of the pot or place them on pre dug holes.**

PICKING UP YOUR PLANTS:

- If you are picking up your trees, we will gladly help to load them on your truck or trailer but you are responsible for checking and making sure your load is secure.
- As soon as you leave the property of Tree Valley Nursery, we are not responsible for damages caused to trees, by trees or trees coming undone.
- Some trees, shrubs or plants could be poisonous; once you buy them the responsibility is yours.

For Installations

These instructions are **ONLY** for installations to be done by TREE VALLEY NURSERY, INC. your private landscaper might have his/her own set of rules.

- We do installation of trees **15-gallon size and up**.
- **Call 811** prior to the installation (it is a free service in Texas to mark your underground cables)
- **Mark the area** where you want the tree installed or have someone at home at the time of installation.
- **Removal of trees/plants** prior to installation have an **extra charge** and need to be **prearranged**

WARRANTY CONDITIONS:

(DOES NOT INCLUDE: Italian Cypress, Mimosa, Dogwood, Texas Mountain Laurel, Yuccas Rostrate, Red Tips, trees on special sales marked no warranty)

Plants are living organisms and they could be affected by many things in their environment. There is a specific set of conditions for warranty.

- Only **retail** purchases of trees **installed by Tree Valley**.
- The warranty is for 90 days from the purchase date
- The warranty is for the tree only, it provides you with a **replacement tree** of the same value – it **DOES NOT** include the labor. The replacement tree has **NO** warranty.
- Acts of nature (frost, flooding, etc.) are not covered by warranty.
- Signs of neglect (like not following watering schedule) will void the warranty.
